

Parking Loaner Cars in the Shop Overnight – Policy and Procedures

- 1 The loaner car process is often much easier if the car has been inside overnight, especially when the weather is less than perfect – including snow, rain, and cold.
- 2 Cleaning off and warming up the car when it sits outside wastes our time when it is unnecessary if the vehicle is inside.
- 3 If there is a loaner car reservation for the next morning (or Monday morning when closing on Friday), park it inside if possible.
- 4 If there is a possible/maybe need for a loaner car the following morning, park it inside.
